Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Allowable Subject Matter

1. Claims 1-55 are allowable over prior art.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on Amendment filed on September 12, 2002:

As in claims 1 and 35, the prior art of record fails to teach or fairly suggest an optical recording medium having a recording layer that changes a state of photo-induced birefringence acting optically as a half-wave plate. Furthermore, the azimuth of the half-wave plate within the optical recording medium is multilevel-modulated so that information is recorded on the optical recording medium by a recording light.

As in claims 11 and 37, the prior art of record fails to teach or fairly suggest an optical recording medium having a recording layer that changes a state of photo-induced birefringence acting optically as a quarter-wave plate. Furthermore, the azimuth of the half-wave plate within the optical recording medium is multilevel-modulated so that information is recorded on the optical recording medium by a recording light.

As in claims 21 and 39, the prior art of record fails to teach or fairly suggest an optical recording medium having a

recording layer in which an azimuth of birefringence that is induced by a recording light. Furthermore, the azimuth of the recording layer is multilevel-modulated so that information is recorded on the optical recording medium by a recording light.

As in claim 30, the prior art of record fails to teach or fairly suggest an optical recording apparatus having a spatial optical modulator and a focusing system that multilevel-modulates an azimuth of an optical recording layer within an recording medium by directing the recording light obtained through the spatial optical modulator to the optical recording medium.

As in claims 40 and 46, the prior art of record fails to teach or fairly suggest an optical reproducing method and means where a reproducing light is directed on an optical recording medium in which an azimuth of a half-wave plate within the optical recording medium has been multilevel-modulated so that recorded information can be reproduced.

As in claims 43 and 49, the prior art of record fails to teach or fairly suggest an optical reproducing method and means where a reproducing light is directed on an optical recording medium in which an azimuth of a quarter-wave plate within the optical recording medium has been multilevel-modulated so that recorded information can be reproduced.

As in claim 52, the prior art of record fails to teach or fairly suggest an optical recording and reproducing apparatus having a focusing optical system that irradiates an optical recording medium with a recording light obtained from a polarization rotary device. An analyzing unit that detects a polarization angle of reproducing light acted on the recording medium. Furthermore, a reproducing light optical system that irradiates the optical recording medium after the optical recording medium has been multilevel-modulated so that recorded information can be reproduced.

As in claims 53 and 54, the prior art of record fails to teach or fairly suggest an optical recording and reproducing information having the following steps and means:

(a) a recording layer that forms an optical element by illumination having an azimuth corresponding to a polarization angle on the optical recording medium;

(b) radiating reproducing light on the optical recording medium;

(c) the reproducing light is radiated onto the optical recording medium after the azimuth of the optical recording element has been multilevel-modulated so that recorded information can be reproduced.

As in claim 55, the prior art of record fails to teach or fairly suggest an optical recording medium having an optical

recording layer in which an optical element is formed by a recording light that is externally controlled from the optical recording medium to rotate a polarization angle of the recording light. The optical element having an azimuth of birefringence and acting on reproducing light to adjust a polarization angle of the reproducing light. Furthermore, the reproducing light is directed onto the optical recording medium after the azimuth of birefringence of the optical element has been multilevel-modulated so that recorded information can be reproduced.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
